

*November Floop Clean-up* - we split up and were able to clear the section from Debdale to Fairfield in just 2 hours (10 bags). This is progress but you can be sure it won't last and it is debatable how regularly we will be able to do this?

Sustrans removed the bags from the Floop within a few days, apart from the recycleables which were taken directly to Sharston. It's quite a faff segregating the litter on the go (splits roughly 50/50) - we are still undecided whether the benefits actually outweigh the inconvenience.
